PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in **CI/CD automation**, cloud infrastructure, and containerized deployments on AWS. Experienced in building **cost optimization** strategies to improve resource efficiency. Proficient in AWS, Docker, Kubernetes, and Terraform. A **collaborative** team player with a proactive **problem-solving** mindset with **strong communication skills** and a passion for **continuous learning** and process improvement.

TECHNICAL SKILLS

Cloud Platforms: AWS Services (EC2, S3, IAM, VPC, EKS, ECR, ALB)

Containers & Orchestration: Docker, Kubernetes

CI/CD & GitOps: Jenkins, GitHub Actions, Argo CD

Infrastructure as Code & Configuration Management: Terraform, Ansible

Scripting & Automation: Python, Bash/Shell Scripting

Operating Systems: Linux

Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch

Version Control: Git, GitHub

Databases: MySQL, MongoDB

Networking : TCP/IP, DNS, HTTP/HTTPS, SSL/TLS, Load Balancing

PROJECTS

1. MEAN Stack Application Deployment Using CI/CD GitHub Action | [GitHub Repo](#)

- Designed and implemented **CI/CD pipeline** using **GitHub Actions** for automated Docker image build and push to Docker Hub, reducing deployment time by 65%.
- Containerized** multi-tier MEAN Stack application (Node.js + MongoDB) using Docker and Docker Compose.
- Deployed the application on AWS EC2 with **Nginx** as reverse proxy and configured **persistent storage** for MongoDB.

Tech Stack : AWS EC2, Docker, Docker Compose, GitHub Actions, Nginx, Node.js, MongoDB

2. Terraform Multi-Environment AWS Infrastructure | [GitHub Repo](#)

- Built **modular Infrastructure as code (IaC)** using Terraform for multi-environment (**Dev, Stage, Prod**) deployment.
- Developed reusable modules for EC2, S3, DynamoDB to improve **scalability** and **maintainability**.
- Configured **remote backend** (S3 + DynamoDB) for secure **state management** and state locking.
- Managed complete **infrastructure lifecycle** Using Terraform (plan, apply, destroy).

Tech Stack : Terraform, AWS (EC2, S3, DynamoDB, VPC), AWS CLI

3. Three-Tier Application Deployment on AWS EKS | [GitHub Repo](#)

- Deployed a scalable 3-tier application on **AWS EKS** with Kubernetes orchestration and AWS ALB for **load balancing**.
- Implemented GitOps-based **CI/CD pipeline** using Jenkins and Argo CD, for **Zero-downtime** deployments.
- Configured K8s resources (Deployments, Services, Ingress, Secrets) for **high availability**, **Auto-scaling** capability and secure secret management.
- Set up Prometheus and Grafana for **monitoring**, dashboards, and alerting to improve **observability**.

Tech Stack : AWS EKS, ECR, ALB, Kubernetes, Docker, Jenkins, Argo CD, Prometheus, Grafana

KEY ACHIEVEMENTS

- Reduced application deployment time by **65%** through GitHub Actions-based CI/CD pipeline automation.
- Improved release efficiency **50%** by implementing GitOps workflow with Jenkins and Argo CD on AWS EKS.
- Reduced manual infrastructure setup effort by **80%** through automation and reusable modules.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Application (BCA)

Gujarat University, Ahmedabad

Jun 2022 – May 2025

DevOps Certification Program

PySpiders Institute, Bengaluru

[View Certificate](#)

Jul 2025 – Jan 2026
